

# Shutter Island Blizzard Bag #3

**Directions:** Please read and answer each question carefully and thoroughly. All parts must be answered for potential full credit. Use **movie support** and **your knowledge** of the brain in both answers. For each question you must use at least 2 pieces of movie evidence and 2 working facts related to the brain.

1. At the beginning of the movie Teddy was sea sick, on a ferry headed to Shutter Island with a partner he never met. What do you think the 3 hours before the movie starts consisted of? In other words, if the movie could show 3 hours before its opening act what might be going on?
2. Which stance do you take on whether Teddy is Edward Daniels or Andrew Laeddis? Remember to use evidence and facts to support your theory.
